EMPOWERING YOUR VISION FOR EXCEPTIONAL WORKPLACES

Lighting Isn't The Goal. Experience Is.

You're not just providing light; you're creating environments. Your work enhances productivity, reinforces brand identity, and helps talent thrive. We understand the goal is to orchestrate how people feel, focus, and function.

Class A Building

We Understand the Balancing Act.

The Challenge: Eliminating screen glare without killing the mood.

Our Solution: Precision optics that minimize reflections while enhancing contrast and illuminating faces.

The Challenge: Integrating lighting into custom ceilings without compromise.

Our Solution: Slim, adaptable solutions designed for TechZone®, baffles, and bespoke mill-work.

The Challenge: Planning for flexible, constantly reconfiguring spaces.

Our Solution: Modular, scalable lighting systems built for the modern agile workplace.

The Challenge: Meeting strict energy codes without a generic, institutional feel.

Our Solution: High-efficacy systems that are LEED and WELL ready, designed with high style.

THE NEW STANDARD FOR WORKPLACE LIGHTING DESIGN

Visual Comfort & Glare Control

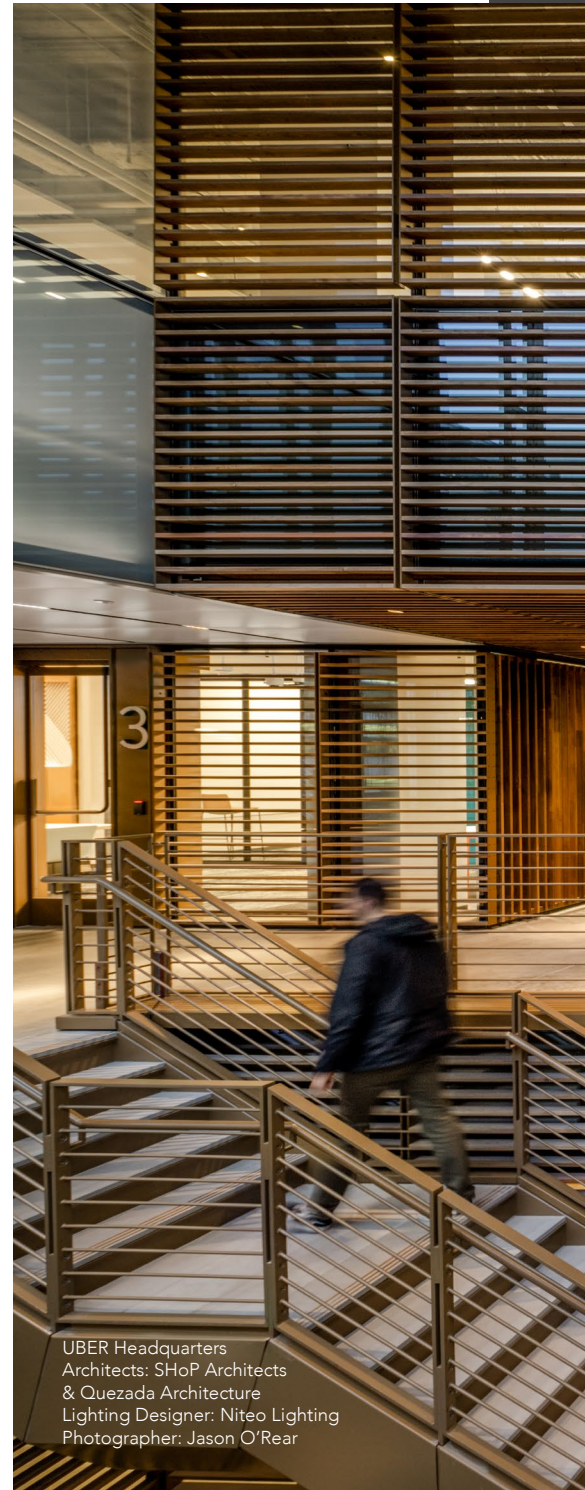

Modern offices require lighting that supports hours of screen use. Our optics are engineered to suppress high-angle light, reducing reflections on monitors and glass walls to prevent visual fatigue.

Seamless Architectural Integration

Ceilings today are expressive architectural planes. Zaniboni systems are designed for seamless compatibility with commonly used ceiling types, including **TechZone®**, wood slats, stretch ceilings, and standard drywall.

Layered Lighting for Function & Identity

Define spaces and build brand identity with layers of ambient, task, and accent light. Our toolkit includes downlights, cylinders, accent heads, and versatile linear options.

Circadian & Adaptive Systems

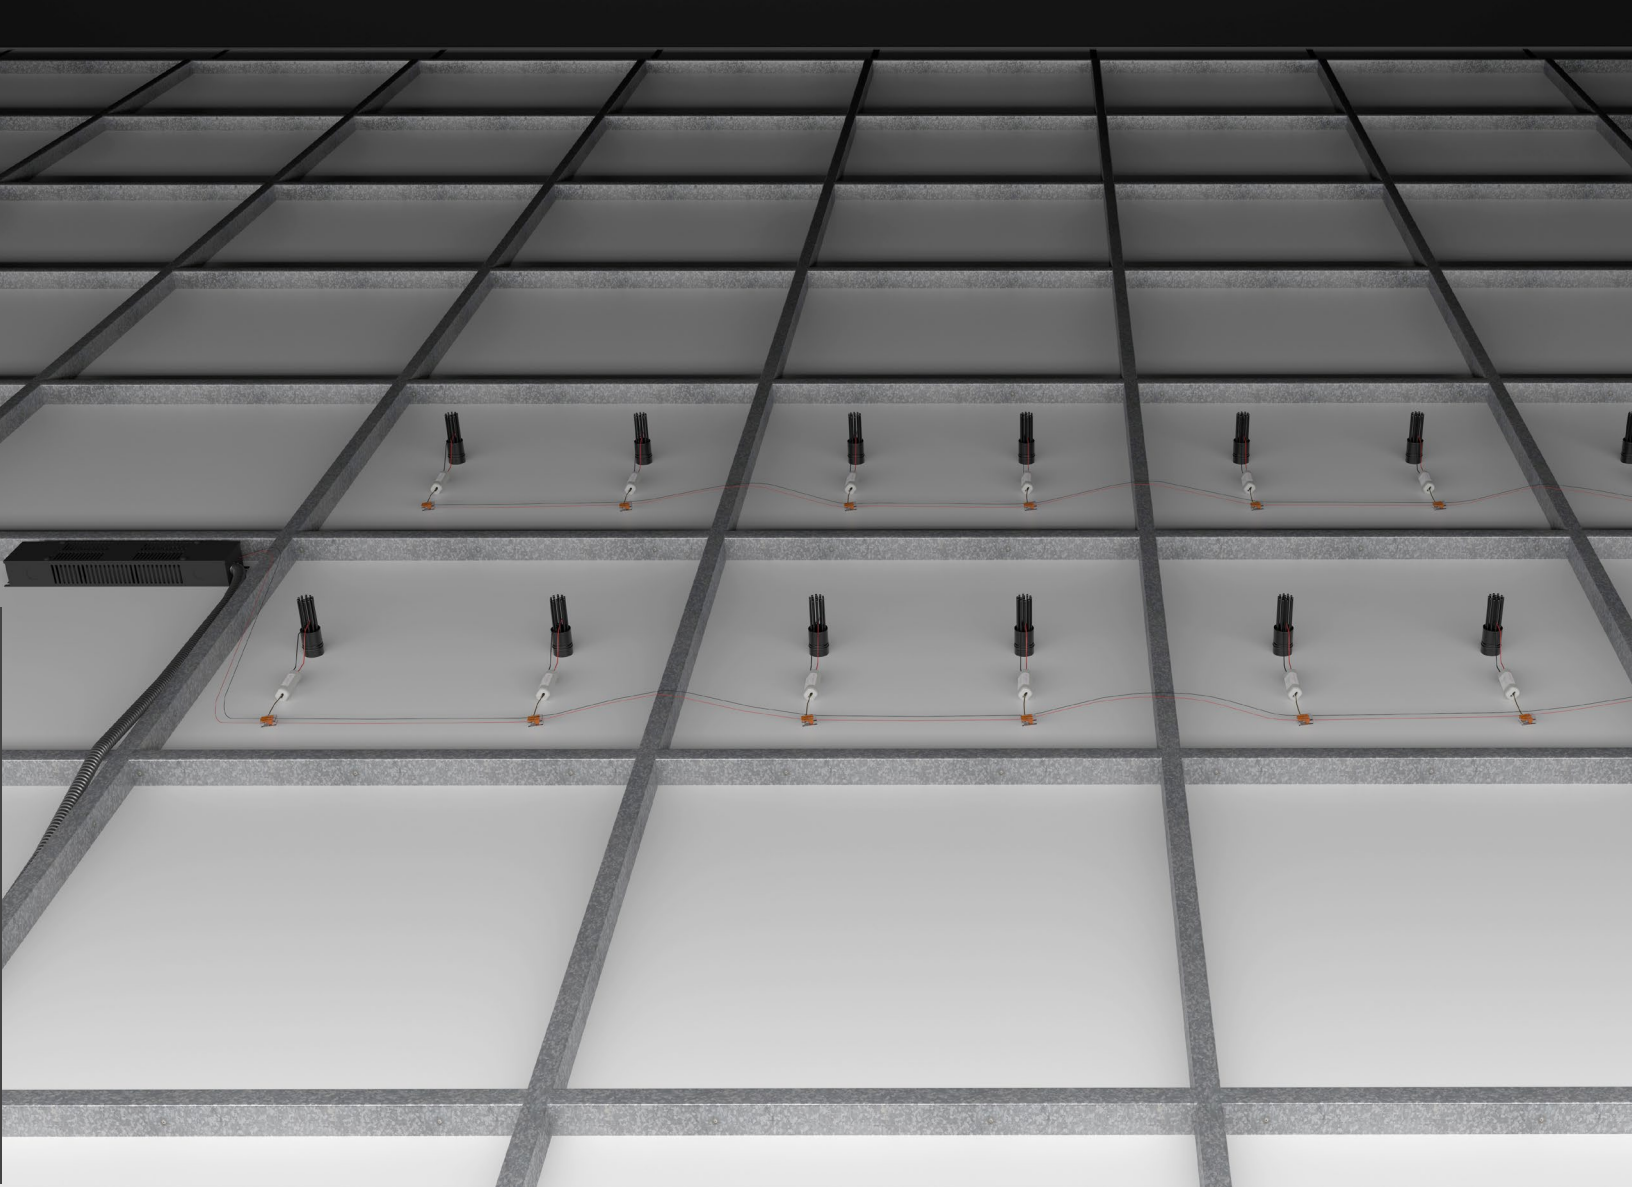

Support employee wellness with lighting that adapts to the rhythm of the workday. Our tunable white and warm-dim systems feature a 480nm boost to support focus and well-being.

Efficiency, Compliance & Control

Meet modern energy codes including LEED, WELL, and Title 24. We offer a full suite of advanced controls like 0-10V, DALI, Casambi, and Lutron integration.

The Class 2 Advantage – Simplifying Complexity

Simplify high-end office designs. Zaniboni's Class 2 systems use one line voltage feed for up to 75 fixtures, eliminating in-ceiling housings. This means cleaner aesthetics, easier installation in crowded ceilings, and lower costs for your client.

Unrivaled Dimming & Control Agility

Achieve your precise lighting vision. Our drivers feature ultra-smooth 'fade-to-black' (0.004%) dimming for flawless scene execution. Integrate seamlessly with **DALI**, **Crestron®**, **Lutron EcoSystem®**, DMX, and more to deliver highly responsive spaces.

THE PREMIER WORKSPACE: YOUR ZANIBONI TOOLKIT

Delivering Precision Task Illumination

Ensure glare-free comfort (UGR <19) and optimal light levels for productive offices.

Ambient: Use **Alba** (EDGLESS), **Stella** (TRIMLESS), and **Luna** Series for superb low-UGR ambient light.

Task Focus: Deploy the discreet **Mini** Series (<1" aperture) or the adaptable **Mini Track** System for focused, flicker-free light.

Diva 3 PD

Designing Inviting Ambient & Circulation Zones

Elevate key circulation zones, lobbies, and corridors.

Adjustable: Employ Diva Multiples for precisely aimable pathway illumination and architectural highlighting.

Decorative: Integrate the stylish Bongo Series pendants to enhance navigation and reinforce brand identity.

Defining Form, Focus & Flow

Guide the eye and add impactful drama.
Sharp Accents: Use the precision narrow beams (10°, 15°) of our **Gem track or monopoint** systems to make features pop.

Powerful Punch: For longer throws, the **Gala** series delivers significant output from a line voltage track.

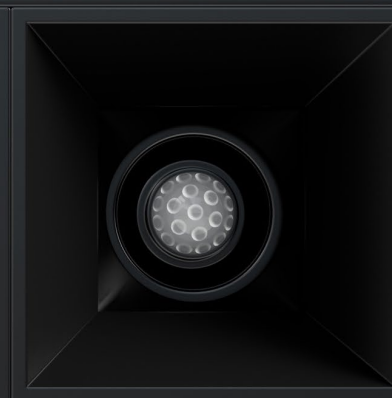

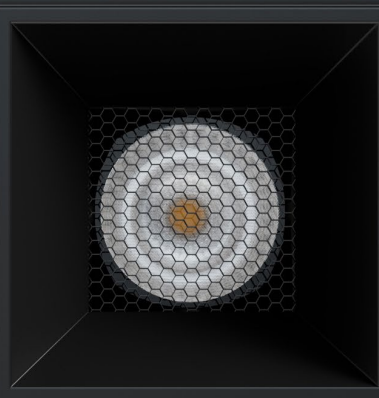

Gala 5 10°

Architectural Base

Diva contributes continuous lines that define architectural spaces, establish visual rhythm, and provide sophisticated ambient illumination.

THIS IS NOT LINEAR LIGHTING IT'S LINEAR ADJACENT

OMNI. Design without limits

Simplify complexity. **Omni** is a single, clean linear channel where lighting, HVAC, audio, and sensors are all seamlessly unified. The result is unprecedented aesthetic control and minimalist harmony.

Task-focused Comfort

Layer in **Riga** over dedicated workspaces. Its exceptionally low UGR (<19) delivers powerful, comfortable illumination directly over workstations without distracting glare or eye strain.
